Web Design and Development - Offer

Marcin Paszkowski: an IT specialist with extensive experience gained at Accenture and currently involved in the Orange Flex project. He actively participates in designing websites, combining modern technologies with an individual approach to each project.

Below, you will find sample pricing for the stages of website development. The final costs depend on the number of subpages and the complexity of the required functionalities.

- **Symfony Framework, Bootstrap, and SEO**
  Basic, static, responsive website using selected frameworks, optimized for SEO.

  Price range **from 9,000 PLN to 15,000 PLN**, depending on the number of subpages.

- **Symfony Bundles, EasyAdmin, and MySQL**
  Adding functionalities such as contact forms, content management, customer and product databases via the admin panel, generating dynamic documents and price lists, multilingual websites, as well as specialized systems, such as online booking for hotel rooms or scheduling appointments with dermatologists or lawyers.

  The price for the basic version of the website and additional costs ranging **from 3,000 PLN to 25,000 PLN**, depending on the complexity of additional functionalities.

- **AI - Artificial Intelligence in Website Management**
  Adding an AI chatbot powered by OpenAI or Google AI to a website, supporting users and automating customer service.

  Price range from **7,000 PLN to 90,000 PLN**, depending on the scope of features, number of topics, and level of integration.

- **WordPress, Facebook**
  Adding a blog on WordPress with basic customization and integration with the main website, or adding elements from Facebook to your website

  Cost: from **2,000 PLN to 5,000 PLN**.

- **Hosting Management**
  Assistance in selecting a hosting provider, transferring the code to production servers, and integrating with the Git version control system.

  Price: **1,500 PLN**.

- **Twig, Google API and JavaScript**
  Implementation of JavaScript elements (e.g. form validation, dynamic menus) and Google API functionalities (e.g. reviews from Google business profiles, autofill in forms) are just some of the solutions we can implement on your website.

  The final price depends on the specific requirements and any additional features that may be needed. Estimated cost: **from 3,000 PLN to 10,000 PLN**.

- **Website Support**
  We also offer website maintenance services, including functionality verification, SEO updates, monitoring, and technical support.

  The first month is free, and after this period, the fee ranges from **300 to 700 PLN** per month, depending on your needs.
